Amendments to the Claims

This listing of claims will replace all prior versions and
listings of claims in the application.

Listing of Claims

1-34. (canceled)

35. (amended) The configuring system of claim [[34]]57,
wherein the portable configuring ~~device~~apparatus comprises
a display screen of configuration-related information.

36-56. (canceled)

57. (new) A configuring system comprising:
    a portable configuring apparatus; and
    wherein:
    the portable configuring apparatus is connectable to
        each air management system of a plurality of air
        management systems;
    the portable configuring apparatus may upload at least
        one configuration from the plurality of air
        management systems;
    the portable configuring apparatus may modify the at
        least one configuration;
    the portable configuring apparatus may download the at
        least one configuration to the plurality of air
        management systems;

Application Serial No. 10/643,386
Amendment dated December 22, 2004
Reply to Office Action dated October 22, 2004

    the portable configuring apparatus is a personal
        digital assistant; and

    the portable configuring apparatus is connectable via
        an infrared connection to each air management
        system of a plurality of air management systems.

58. (new) A configuring system comprising:

    a portable configuring apparatus; and

    wherein:

    the portable configuring apparatus is connectable to
        each air management system of a plurality of air
        management systems; and

    the portable configuring apparatus may transfer a
        configuration of one air management system to
        another air management system of the plurality of
        air management systems.

59. (new) A portable configuration device comprising:

    a storage for holding configurations of air management
        controllers;

    a configuration modifier connected to the storage;

    a configuration downloader connected to the storage;
        and

    a configuration up-loader connected to the storage;
        and

    wherein:

Amendment dated December 22, 2004
Reply to Office Action dated October 22, 2004

the configuration provides parameter and mechanism
        monitoring and control for the respective air
        management air controllers;

the up-loader may upload configurations from air
        management controllers to the storage;

configurations may be created and/or customized by the
        configuration modifier;

the configurations may be downloaded from the storage
        to the air management controllers;

the portable configuration device is a personal
        digital assistant; and

up-loading and downloading is via an infrared light
        between the personal digital assistant and the
        air management controllers.

60. (new) A means for configuring a plurality of
controllers for management of air in contained spaces,
comprising:

        means for storing configurations of controllers for
                management of air;

        means for creating configurations for the controllers;

        means for uploading configurations from the
                controllers;

        means for modifying configurations of the controllers;

        means for downloading configurations to the
                controllers; and

        means for transferring configurations between
                controllers.

61. (new) A configuring system comprising:

a portable configuring apparatus; and

wherein

the portable configuring apparatus is connectable to
each air management system of a plurality of air
management systems;

the portable configuring apparatus may upload at least
one configuration from the plurality of air
management systems;

the portable configuring apparatus may modify the at
least one configuration;

the portable configuring apparatus may download the at
least one configuration to the plurality of air
management systems; and

the portable configuring apparatus is connectable via
an infrared connection to each air management
system of a plurality of air management systems.
